TIPP: How can you reduce the self risk? Choose the SELF RISK INSURANCE for an additional fee. In case of a damage you will pay the SELF RISK on spot and send a claim to the third party insurance company. This insurance company will refine the self risk in accordance to the policy. The SELF RISK INSURANCE is an addition and only includes options (marked with X). Excluded options are also excluded by it.

Liability

F.e. If you hit another car by accident within the conditions of the rental agreement. The self risk of such an accident will be 200 € per incident. If you get hit by another car and it's not your fault (determined by the insurance company) you will not have to pay any self risk. The other vehicles insurance would in such a case cover your vehicle.

KASKO

If you damage the vehicle or hit another car damaging the own vehicle as well the KASKO can lower the self risk tremendously. If this option is not chosen you will have to pay up to the full value of the vehicle.

Interior

If the interior of the vehicle gets damaged f.e. tables, doors, handles, stoves, radio etc.

Sand and ash

It covers damages caused by sand (f.e. sand storms) and ash.

Windshield

A common damage in Iceland is a broken windshield. A damaged windshield can cost 1200 EUR. By choosing the right CDW you can lower the self risk.

Gravel Protection

Also a common damage is a small crack in the paint caused by gravel (small stones).

ALL DAMAGES ARE HANDLED PER INCIDENT, RATE APPLIES PER INCIDENT
